

TABLE OF CONTENTS

UNIT I

Chapter - 1	Automata and Regular Expressions	(1 - 1) to (1 - 98)
1.1	Need for Automata Theory	1 - 2
1.2	Introduction to Formal Proof	1 - 2
1.3	Additional Forms of Proof	1 - 2
1.3.1	A Proof about Sets	1 - 3
1.3.2	Proof by Contradiction	1 - 3
1.3.3	Proof by Counter Example	1 - 5
1.4	Inductive Proof	1 - 5
1.5	Finite Automata (FA)	1 - 14
1.5.1	Definition	1 - 14
1.5.2	Finite Automata Model	1 - 14
1.5.3	Representation of Finite Automata	1 - 15
1.5.4	Types of Automata	1 - 16
1.6	Deterministic Finite Automata (DFA)	1 - 17
1.7	Non-deterministic Finite Automata (NFA)	1 - 27
1.8	Finite Automata with Epsilon Transitions	1 - 30
1.9	Equivalence of NFA with ϵ to NFA without ϵ	1 - 33
1.10	Equivalence of NFA and DFA	1 - 48
1.11	Equivalence of NFA with ϵ to DFA	1 - 61
1.12	Minimization of DFA	1 - 75
1.13	Two Marks Questions with Answers	1 - 89

UNIT II

Chapter - 2	Regular Expressions and Languages	(2 - 1) to (2 - 52)
2.1	Regular Expression and Regular Languages	2 - 2

2.2 Equivalence of Finite Automata and Regular Expressions.....	2 - 5
2.3 Equivalence of NFA and Regular Expression.....	2 - 5
2.3.1 Direct Method for Conversion of RE to FA.....	2 - 13
2.4 Conversion of Finite Automata to Regular Expressions.....	2 - 18
2.5 Equivalence of Two Regular Expressions.....	2 - 24
2.6 Proving Languages to be not Regular (Pumping Lemma).....	2 - 28
2.7 Closure Properties of Regular Languages.....	2 - 37
2.8 Two Marks Questions with Answers.....	2 - 41

UNIT III

Chapter - 3 Context Free Grammar and Push Down Automata (3 - 1) to (3 - 72)

3.1 Types of Grammar and Chomsky's Hierarchy of Languages.....	3 - 2
3.2 Context-Free Grammar (CFG) and Languages.....	3 - 4
3.3 Derivations.....	3 - 4
3.4 Parse Trees.....	3 - 12
3.5 Leftmost Derivation and Rightmost Derivation.....	3 - 14
3.6 Ambiguity in Grammars and Languages.....	3 - 17
3.7 Definition of Pushdown Automata.....	3 - 22
3.8 Instantaneous Description.....	3 - 23
3.9 Languages of Pushdown Automata.....	3 - 39
3.9.1 Acceptance by Final State.....	3 - 40
3.9.2 Acceptance by Empty Stack.....	3 - 40
3.9.3 Equivalence by Finite State and Empty Stack.....	3 - 40
3.10 Equivalence of Pushdown Automata and CFG.....	3 - 42
3.10.1 CFG to Pushdown Automata (PDA).....	3 - 42
3.10.2 PDA to CFG.....	3 - 50
3.11 Deterministic Pushdown Automata.....	3 - 59
3.12 Two Marks Questions with Answers.....	3 - 62

UNIT IV

Chapter - 4 Normal Forms and Turing Machines (4 - 1) to (4 - 100)

4.1 Simplification of CFG	4 - 2
4.1.1 Removal of Useless Symbols	4 - 2
4.1.2 Elimination of Productions from Grammar	4 - 6
4.1.3 Removing Unit Productions	4 - 9
4.2 Normal Forms for CFG	4 - 12
4.2.1 Chomsky's Normal Form (CNF)	4 - 13
4.2.2 Greibach Normal Form	4 - 26
4.3 Pumping Lemma for CFL	4 - 38
4.4 Closure Properties of Context Free Languages	4 - 45
4.5 Applications of CFG	4 - 50
4.6 Turing Machine : Basic Model	4 - 51
4.6.1 Definition	4 - 51
4.6.2 Representation	4 - 52
4.7 Language Acceptance by TM	4 - 52
4.8 TM as Computer of Integer Functions	4 - 53
4.9 Programming Techniques for Turing Machine (Subroutines)	4 - 59
4.9.1 Storage in Finite Control	4 - 59
4.9.2 Multiple Tracks	4 - 59
4.9.3 Checking Off Symbols	4 - 60
4.9.4 Subroutine	4 - 60
4.10 Problems Based on Turing Machine	4 - 64
4.11 Two Way Turning Machine	4 - 75
4.12 Types of Turing Machine	4 - 90
4.12.1 Multi Head Turing Machine	4 - 91
4.12.2 Multi-tape Turing Machine	4 - 91
4.13 Two Marks Questions with Answers	4 - 92

UNIT V

Chapter - 5 Undecidability (5 - 1) to (5 - 28)

5.1 Unsolvable Problems	5 - 2
5.1.1 Decidability Problems Concerning Regular Languages.....	5 - 2
5.1.2 Decidability Problems Concerning Context Free Languages	5 - 3
5.1.3 Unsolvable Problem about TM.....	5 - 3
5.1.3.1 Halting Problem	5 - 3
5.2 Computable Functions	5 - 5
5.3 Recursive and Recursively Enumerable Languages.....	5 - 6
5.4 Properties of Recursive and Recursively Enumerable Languages.....	5 - 6
5.5 Post's Correspondence Problem	5 - 10
5.5.1 Modified PCP	5 - 11
5.6 Universal Turing Machine (UTM).....	5 - 15
5.7 Tractable and Intractable Problems	5 - 16
5.8 P and NP Class	5 - 17
5.9 Kruskal's Algorithm (Example of P Class Problem).....	5 - 19
5.10 Travelling Salesman Problem (Example of NP Class Problem).....	5 - 20
5.11 Difference between P and NP Class Problems	5 - 21
5.12 Polynomial Problem Reduction.....	5 - 21
5.13 The 3-SAT Problem	5 - 23
5.14 NP Complete Problem	5 - 23
5.15 Two Marks Questions with Answers	5 - 25

Solved Model Question Paper (M - 1) to (M - 4)
